PROFESSIONAL SUMMARY

Technical Project Manager with a strong software engineering foundation across React, Next.js, Node.js, and API architecture, with 3+ years of experience delivering technical projects and leading cross-functional teams. Skilled at translating business and product requirements into actionable technical plans, coordinating engineering execution, managing integration risks, and improving delivery processes. Experienced in Agile/Scrum environments, multi-system integrations, and end-to-end software delivery across EdTech, e-commerce, and SaaS. Backed by 35 PDUs of formal PMP exam preparation.

CORE COMPETENCIES

Technical Project Management: Scope & Schedule Management, Technical Planning, Requirements & Technical Specifications, Risk Assessment & Mitigation, Dependency Management, Release Coordination

Agile Delivery: Scrum & Kanban, Sprint Planning, Backlog Grooming, Capacity Planning, Blocker Resolution, Delivery Tracking

Technical Architecture Fluency: Frontend (React, Next.js), Backend (Node.js), API Architecture (REST, GraphQL), Third-Party Integrations, Payment Gateways (Stripe, Paystack)

Delivery & Testing Tools: Jira, ClickUp, Git/GitHub, GitHub Actions, Jest, React Testing Library, Figma, Postman

PROFESSIONAL EXPERIENCE

Novtryx Ltd. | Web Developer / Team Lead

Sep 2025 – Jul 2026 | Remote

- Led a cross-functional engineering team of 5, coordinating sprint execution, task ownership, technical decisions, and end-to-end delivery of a scalable ticketing platform.
- Translated product requirements into actionable sprint goals, prioritized technical work, and aligned engineering execution with business and product objectives.
- Restructured sprint planning, task tracking, and pull request workflows, reducing feature cycle time by ~35% while improving delivery consistency and code quality.
- Owned team delivery across third-party payment integrations (Paystack, Stripe) and real-time platform infrastructure, proactively identifying technical risks and coordinating mitigation strategies.
- Facilitated Agile ceremonies including daily standups, sprint planning, backlog refinement, and retrospectives, improving team accountability and visibility across delivery milestones.
- Established engineering standards around code reviews, automated testing, and release readiness, contributing to fewer post-release defects and more reliable deployments.
- Collaborated closely with product and UI/UX stakeholders to clarify requirements, resolve delivery blockers, and ensure features met accessibility and product requirements within agreed timelines.

Voltis Labs | Web Developer

Jun 2025 – Aug 2025 | Remote (UK)

- Developed and optimized responsive web applications, improving existing website performance, page speed, and overall user experience through frontend optimization and performance improvements.
- Contributed to the development of a media conversion SaaS platform, building frontend features and integrating **Stripe** payment functionality for secure subscription and transaction flows.
- Developed web components and user-facing features for a mobile gaming product, ensuring responsive layouts and smooth interactions across desktop and mobile devices.
- Contributed to an online learning platform through feature development, UI implementation, bug fixes, and performance improvements through the product delivery lifecycle.

- Collaborated with backend engineers to integrate REST APIs, troubleshoot data and integration issues, and ensure reliable communication between frontend applications and backend services.

Profitall Ltd | Frontend Developer

Apr 2025 – Jun 2025 | Remote (Lagos, Nigeria)

- Developed and maintained frontend features for a **white-label e-commerce platform**, building reusable interfaces that could be adapted across multiple brand themes and storefronts.
- Collaborated closely with **UI/UX designers, frontend and backend developers, and QA engineers** to translate designs into production-ready features and ensure consistent product quality.
- Integrated product, payment, order, and other backend APIs into the frontend, ensuring reliable data flow and smooth user experiences across different storefronts.
- Improved website performance by optimizing assets, components, and frontend delivery, contributing to a **28% reduction in total bundle size**.
- Participated in code reviews, testing, bug fixing, and release activities, helping coordinate frontend changes across multiple concurrent product requirements.

Axum Technologies | Software Developer

Oct 2024 – Apr 2025 | Hybrid (Nigeria)

- Developed and maintained features for a **vending management platform**, contributing to both frontend and backend functionality across the product lifecycle.
- Quickly adapted to **Grails and PHP** to contribute to existing systems, troubleshoot issues, and deliver features within the team's development workflow.
- Built and integrated frontend features with backend services, working across application logic, APIs, data flows, and user-facing interfaces.
- Collaborated with other developers to troubleshoot production issues, implement fixes, and deliver **3 major production releases** within scheduled timelines.

Punch Group | MERN Stack Developer

May 2024 – Oct 2024 | Remote (USA)

- Developed and maintained frontend features for an internal **staff management system**, building responsive interfaces and reusable React components for key staff workflows.
- Collaborated with UI/UX designers, backend developers, and other team members to translate requirements into user-friendly interfaces and deliver features in phased releases.
- Integrated **GraphQL APIs** into the frontend and contributed to supporting backend functionality using Node.js and Express when required.
- Guided and supported an intern through development tasks, code reviews, debugging, and day-to-day frontend development practices.

Cybertech | Web Developer

May 2023 – Jun 2024 | Calabar, Nigeria

- Developed and maintained the company website, implementing responsive interfaces, content updates, performance improvements, and ongoing frontend enhancements.
- Contributed to the development of websites and web applications for selected client projects, translating designs and requirements into responsive, functional web experiences.
- Worked across multiple web projects, adapting to different requirements, designs, and technologies while maintaining consistent code quality and user experience.

EDUCATION & CERTIFICATIONS

- B.Sc. in Computer Science – University of Calabar, Nigeria | Graduated March 2025
- PMP Exam Preparation (35 Contact Hours / PDUs) – Udemy | 2026
